

NON-TOXIC BED BUG IPM

BugScents™ Sentry Pro

Next-generation non-toxic bed bug early detection & active monitoring system.

Patented UK Pheromone Technology

3-Month Continuous Protection

Insecticide-Free & Eco-Safe

The Challenge and the IPM Solution

The Problem

Bed bugs are cryptic, insecticide-resistant, and hide in tiny crevices. Traditional inspections take up to 30+ minutes per room, and reactive chemical treatments often miss early-stage bed bug infestations.

The GPA Solution

Moving India toward scientific, non-toxic monitoring. **BugScents™** Sentry Pro actively draws bed bugs out of hiding before they multiply or disrupt operations.

Advanced Biological Technology

Nature-Inspired, Science-Backed

Developed by entomologists at Arctech Innovation (UK).

Aggregation Pheromone Lure

Replicates natural signals that bed bugs use to locate safe harbourages.

360° Entry, 60 Guidance Channels

Exploits thigmotactic (edge-following) behavior to guide bugs straight into the lure.

Ceiling Capture System

Sticky board traps pests on their backs for clear, effortless visual confirmation.

Tailored value for property owners and pest controllers

For Homes, Hotels, Hostels & Hospitals

→ **Protect Brand Trust**
Prevent negative guest reviews and safeguard brand reputation.

→ **Discreet Placement**
Wafer-thin form factor hides seamlessly behind headboards or under divans.

→ **Cost Control**
A single unmanaged incident can cost thousands in lost bookings and room downtime.

For Pest Control Operators (PCOs)

→ **Fast Pre/Post Assessment**
Confirm active bed bug infestations in 24–96 hours and verify 100% bed bug treatment success.

→ **Nymph Detection**
Proven field performance in capturing small, early-stage bed bug nymphs that visual checks miss.

→ **Audit-Ready Reliability**
Clear evidence-based reporting for quality assurance audits.

Deployment and Specifications

Placement Strategy

Deploy 2 traps per bed at the head end (on walls, behind headboards, or under frames).

Lure Life

3 Months per sachet.

Maintenance

Inspect monthly and replace glue board every 3 months or upon bed bug capture.

Storage

Store in a cool, dry place below 25°C.
